**Louvers and Cloth Honeycomb Grids!** Wide-spread, directional lighting is no longer a contradiction in terms! Light spills are effectively reduced without affecting the dimensions of the light. Ideal, not just for nudes and people photography. Please note that the enclosed front diffuser is needed when using the louvers. The cloth grids have elastic around the edges and can be slipped on the softbox. Note: Cloth grids and louvers are designed for use with the Softbox Type Ultra III.
